- Partnered with SEO leads, directors, and account managers to plan and execute SEO strategy across client accounts, including technical audits, content briefs, and local SEO initiatives.
- Designed answer-first content systems for AEO and GEO: definitional intros, question-led sections, FAQ blocks, source citations, and schema that helped AI Overviews and LLMs extract and cite client pages.

- Resolved SEO requests across client accounts, triaging and addressing technical, on-page, content, and local SEO issues.
- Troubleshot and implemented conversion tracking fixes using Google Tag Manager (GTM) and Google Analytics 4 (GA4).
- Implemented and troubleshot JSON-LD schema markup across page types to improve structured data accuracy and rich-result eligibility.

- Applied AEO/GEO to service pages and blogs: answered the query in the opening paragraph, structured follow-ups as question-led sections, cited authoritative sources, and added FAQ/schema for extractability.
